

Resolve If a student accidentally clicks on the yellow STOP button instead of the blue Pause

If students press the stop button by mistake:

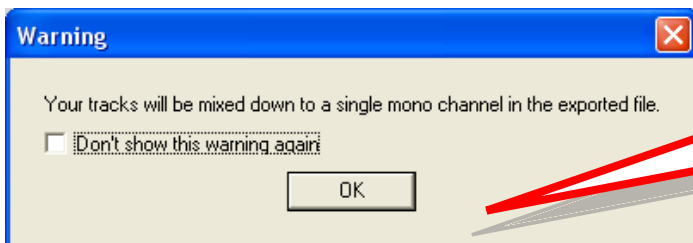

- Have them raise their hand.
- Instruct them to use their mouse to click a tiny bit after the END of their recording. (see example below)

- They should now see a black vertical line like this at the end of their recording.

Now when they click on the Red Record button again, it will start recording at the end of their first one.

Now when they go to File>Export as MP3- it will mix them down into a single track that is ONE recording. Click **OK**.
